## JOB PROFILE

PEBBLE BEACH GOLF LINKS, CALIFORNIA

PEBBLE BEACH

The Pebble Beach SCADA System allows control and monitoring of 3 separate water systems.

- Drinking water pump stations.
- Forest Lake Treatment Plant and Reclaim Water Storage System.
- Sewage lift pump stations.

The Scada Computer System is comprised of 4 computers. Three of the computers are used as one system with two redundant polling / logging

servers and one historical data server. The fourth computer is a Versaview touchscreen operator interface which is mounted in a control panel door at the Forest Lake Treatment Plant.

### About Tesco Controls

Headquartered in Sacramento, CA, since 1972, Tesco Controls, Inc. is America's leading water and wastewater system integrator and control system manufacturer.

Tesco Controls' SCADA systems allow municipal water/wastewater and irrigation districts to monitor and control treatment plants, water distribution systems, and wastewater collection systems.

## **JOB PROFILE: PEBBLE BEACH GOLF LINKS, CALIFORNIA**

Our SCADA system installations, now over 300 systems nationwide, are in operation throughout California, as well as in Washington, Nevada, New Mexico, Colorado, Louisiana, Alabama, and Florida. These systems consist of multiple Programmable Logic Controllers (PLCs) that communicate between central sites and various remote sites over telephone lines, fiber optics, radio links, or dedicated cable television. Our redundant, open architecture SCADA software and hardware systems feature multi-user, multi-tasking, real time graphic user interfaces with report capability, designed specifically around the demanding needs of the water/wastewater industry.

To date, our installed base of products and control systems is in excess of \$300 million.
