Extended Maintenance and System Services

The employee-owners of Tesco Controls, Inc. are proud to announce our newest department, and a groundbreaking new concept in service and support, **EMASS**.

EMASS, or Extended Maintenance and System Services, is an innovative program that offers a wide range of cost-efficient, high-value support and professional services. These services have been developed to help you achieve your maintenance objectives, while targeting critical preventive maintenance services.

Partnering with our EMASS group gives you access to Tesco Controls' thirty-plus years of experience as America's leading water and wastewater system integrator and control system manufacturer. That experience has enabled us to provide insightful and original product and maintenance solutions that will increase reliability, reduce downtime, and extend the life of your equipment.

Unparalleled customer service has always been at the core of Tesco Controls' business, and EMASS takes that value to an entirely new level. Tesco has added CSIA Certified Technicians, 24/7 on-call availability and nationwide coverage in order to extend our already legendary level of service and support.

You have a choice when selecting a maintenance provider. Tesco Controls' EMASS is the *right* choice.

Value, service, and confidence. Tesco Controls' EMASS.
